

Assignment1 UML Design

Name: 胡玉斌

Student ID: 11712121

Question1:

Explanation:

In this use case diagram, there are 5 types of actors: Car, Driver, Shopping mall, Intelligent Device and Adiministrator.

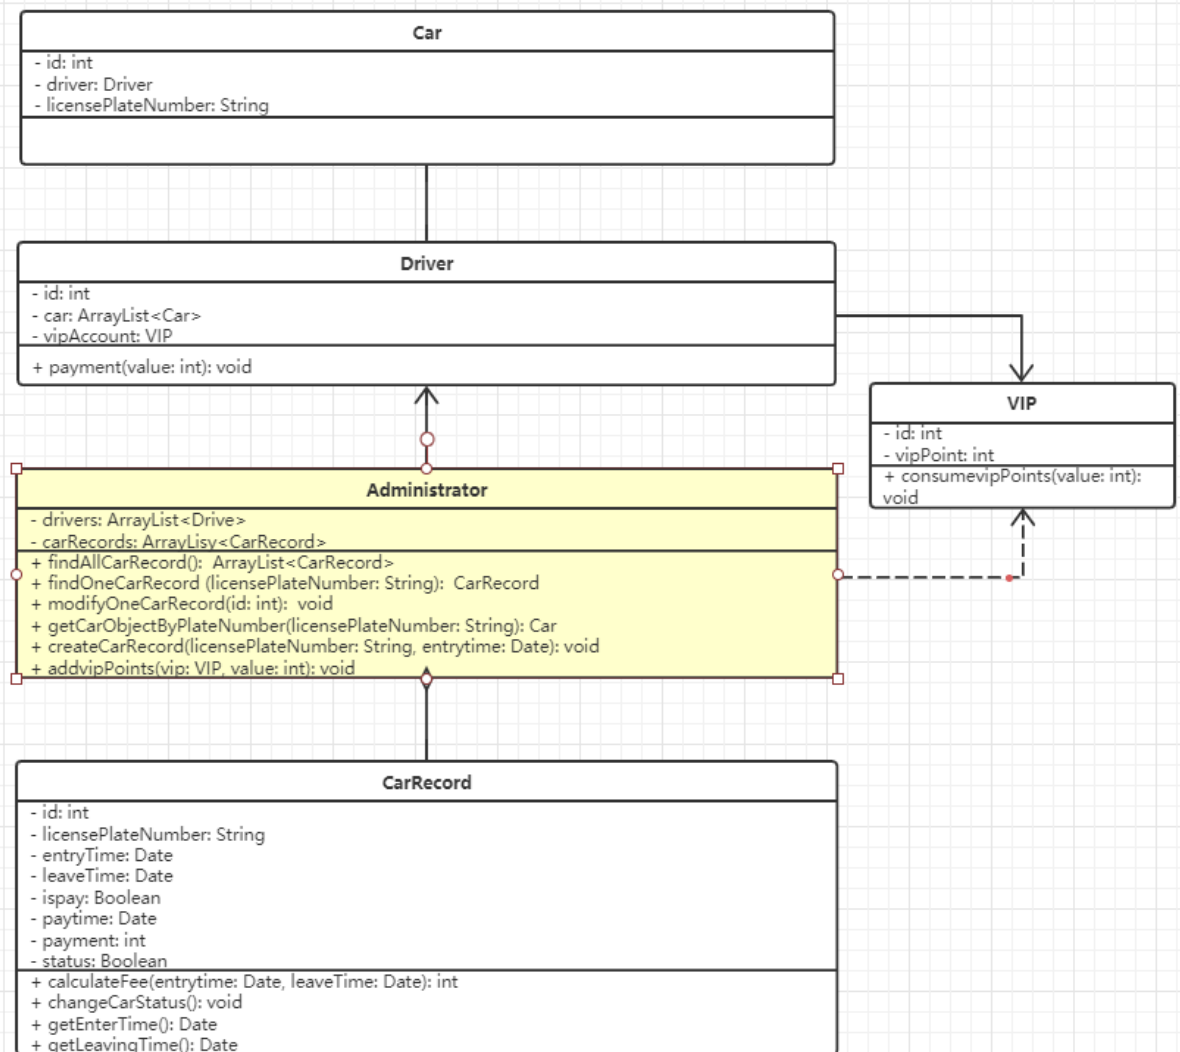

When Car enters the parking area, Intelligent Device will register the car's info, scan the license plate and register the entry time.

When Car wants to leave the parking area, the Driver should pay first, he can pay by cash or VIP points. Time will record the time after the Driver's payment. If time is over 15mins, it will recalculate the parking fee and Driver will pay it.

Shopping mall set a VIP day, and when Time find it is a VIP day, it will send VIP points to each VIP account.

Administrator will keep a list of parking cars, query and modify information of each car and query the parking histroy.

Question2:

Explanation:

In this class diagram, Administrator is the control class. Car, Driver, CarRecord and VIP is entity

class. All entity classes store data and they have several "get" or "set" methods. Control class control other classes.

Question3:

Driver

Administrator/APP

CarRecord Database

Scan QR code

Response app

Register the license plate number

findOneCarRecord()

Alt

[If the number
is valid]

Response info

[else]

Response error message

Opt

Use cash

CashPayment

Check

Use VIP points
or
Use VIP points
and cash

VIPPayment

Check

Alt

[Is Enough
by VIP points]

[Not enough]

Response error message

CashPayment-remain

Check

Alt

[Payment
done]

Response success message

[else]

Response error message

Response success message

Response error message

Explanation:

1. Customer needs to scan the QR code.
2. Register the license plate number
3. If the number is valid, the app can return the parking information about the parking time and how much it will cost, otherwise it will return an error message.
4. Customer need to pay the parking fees
5. If the customer has a VIP account of the shopping mall, he/she can use the VIP points to deduct all or some of the parking fees.
6. We will check whether the payment is enough, if not enough, the car cannot leave the parking area and need to pay the remaining fee.
7. Once the payment is done, a message is displayed in the screen, indicating the driver that need to leave the parking in 15 minutes
